PROFESSIONAL SUMMARY

Recent B.Sc. Data Analytics graduate (completed 2026) and Contributor to Google DeepMind, Kornia, and Open Climate Fix. Expert in building low-latency AI applications (<100ms) with a focus on Computer Vision, Differentiable Programming, and Deep Learning. Recognized as a Regional Finalist in the Delhi Startup Yuva Festival for RailFlow AI and winner of the DSEU Rajokri Campus Hackathon. Proven track record of optimizing data pipelines and reducing report generation times by 95% while deploying scalable, high-impact ML solutions.

EDUCATION

B.Sc Data Analytics - DSEU Rajokri Campus | Jun 2023 - 2026 | Delhi, India

- **CGPA:** 8.8
- **Coursework:** Data Analysis, Advance Excel, Data Structure and Algorithm, Discrete Mathematics, Statistical Modeling, Machine Learning, Database Management (SQL), Data Visualization using Python, Power BI
- **Achievements:**
 - DSEU RIT Campus Hackthon 2025 1st place winner [Link](#)
 - DSEU RIT Campus Badminton 2025 2nd place winner
 - Selected in Delhi Startup Yuva Festival 2025 - 2026 [Link](#)

SKILLS

- **Programming Languages:** Python, SQL, Javascript, Html, Css, tailwindcss
- **Web Frameworks and APIs:** FastAPI, Node.js, Flask, Django
- **Data Science and Machine Learning:** Pandas, NumPy, TensorFlow, Keras, PyTorch, spaCy, Scikit-learn, Differentiable Programming
- **Computer Vision,NLP and LLMs:** OpenCV, Kornia, deepface, RAG Pipelines, LangChain, Langgraph, NLTK, n8n
- **DevTools:** Docker, Git, MySQL, pixi, n8n
- **Data Visualization and Analytics:** Power BI, Excel, Matplotlib, Seaborn, Streamlit

EXPERIENCE

Project Intern - Edunet Foundation | APR 2025 - MAY 2025 | New Delhi, India [\[Certificate\]](#)

- Processed and analyzed **2,000+ agricultural soil samples** using **Pandas** and **Jupyter Notebook**, implementing a **Decision Tree algorithm** via **scikit-learn** to optimize fertilizer ratios and reduce chemical waste by **~15%**.
- Deployed a **Streamlit dashboard** ([Demo](#)) to visualize crop viability, cutting interpretation time by **40%**.

AI/ML Intern - UptoSkills | Feb 2026 - Jun 2026 | Delhi, India (Remote) [\[Certificate\]](#)

- Built secure **REST APIs** and backend logic using **Fernet-encrypted payload storage** and JSON packaging for live meetings.
- Developed a Gemini-powered **CaptionGen** app with robust output parsing and **Pydantic validation**.
- Built a **Document Generator**, **Sentiment Analysis pipeline**, and a **CustomCanva_AI** AI recap review system.

PROJECTS

AIVOX (AI Interview Coach) | September 2025 | DSEU Delhi Skill Entrepreneurship University [\[Github\]](#) [\[Live\]](#)

Real-time interview coaching platform integrating AI technologies for comprehensive interview preparation.

- Built **Groq/Whisper** pipeline with **<100ms** latency, integrating **MediaPipe** at **32 FPS** for visual cues.
- Optimized **FastAPI** backend for high concurrency, reducing report generation times by **95%**.

Tech Stack: FastAPI, LangChain, Google Gemini API, MediaPipe, OpenCV, PyTorch, Groq

Automated SQL Query & Reporting System [\[Github\]](#)

Generative AI Natural Language to SQL engine and data reporting interface for instant data access.

- Engineered Text-to-SQL engine with **Gemini LLM**, achieving **91.2%** accuracy across complex schemas.
- Used **Streamlit** & **Pandas** to visualize reporting, reducing generation from **10 minutes** to **<1 second** across 500+ queries.

Tech Stack: streamlit, langchain-huggingface, PyMySQL, SQLAlchemy, sentence-transformers, chromadb

Pneumonia Detection [\[Github\]](#)

CNN-based medical diagnostic system for pneumonia detection from chest X-rays.

- Trained and optimized a **CNN** on chest X-rays, achieving **91.3%** validation accuracy and minimizing false negatives.
- Deployed the final model via **FastAPI** for low-latency, real-time inference.

Tech Stack: TensorFlow, CNN, FastAPI, Computer Vision, OpenCV, NumPy, Matplotlib, Data Augmentation, Git/GitHub

OPEN SOURCE CONTRIBUTIONS

kornia/kornia #3473 | January 2026 | Closed [\[Github\]](#)

Designed rectangular and truncated Gaussian kernels for mutual information loss calculations.

google-deepmind/optax #1514 | November 2025 | Closed [\[Github\]](#)

Documented the mathematical differences between `kl_divergence` and `convex_kl_divergence`.

CERTIFICATIONS

- **Data Science** - Testdome (October 2025) [\[Certificate\]](#)
- **Big Data Foundations - Level 1** - IBM (August 2025) [\[Certificate\]](#)
- **GenAI Job Simulation** - BCG (August 2025) [\[Certificate\]](#)
- **Software Engineering Job Simulation** - Quantum (September 2025) [\[Certificate\]](#)
- **AI and Data Scientist** - OneRoadmap (August 2025) [\[Certificate\]](#)
